PROJECTS

Study-Notion

- Project Link : <https://study-notion-dusky.vercel.app/CLICK-ME>
- This is a **Educational platform** for students and instructor who are searching for platform for exchanging Knowledge. I used **MERN** stack to build this app styled with Tailwind CSS framework. For authentication I used JWT. For deploying, I hosted frontend with Vercel & backend with Render.
- Educational platform where instructor can add courses and students can enroll on the course and watch it and can give rating to the course.

Friendify-Social Media App

- Project Link: <https://friendify-frontend.vercel.app/Click-Here>
- Friendify is a **Social Media app** where users can post their work. User can like their post and can give suggestions and reply also. Can see user profile and also can chat with them.
- User can see other user profile and can see others as well as yours post.

Language Translator

- Project Link: <https://friendify-frontend.vercel.app/Click-Here>
- Language Translator is a translation app where users can paste or write less than 1000 words and will convert in **115 languages**. It is done with HTML Tailwind Javascript. API

React News App

- Project Link: <https://news-react-app-eta.vercel.app/Click-Here>
- React News App is build with React | Tailwind | Chakra-UI. It works with API call with **Pagination**.

Tic Tac Toe

- Project Link: <https://marvelous-piroshki-a31ebe.netlify.app/Click-Here>
- Tic Tac Toe App is build with HTML | Tailwind | Chakra-UI. It works with **AI** one move of the game is played by **user and AI**.
